Report: Course Evaluation, to the Teachers

Dear Instructor BLANCO-SILVA,

This email contains evaluation results for CALCULUS I (MATH 141 008) / MathEval - SPRG 2010:

31 students are enrolled for this course. Participation 70.97%

The global indicators are listed first, followed by the individual average values, consisting of the following scales:

- INSTRUCTOR EVALUATION (Part I)
- INSTRUCTOR OVERALL
- STUDENT OUTCOME (PART II)
- COURSE EVALUATION (Part III)
- OVERALL COURSE EVALUATION (PART IV)
- MISCELLANEOUS INSTRUCTOR QUESTIONS

In the second part of the analysis the average values of all individual questions are listed.

1. DEMOGRAPHICS

1.1) Classification:

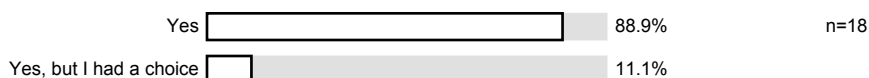

n=20

1.2) Cumulative GPR?

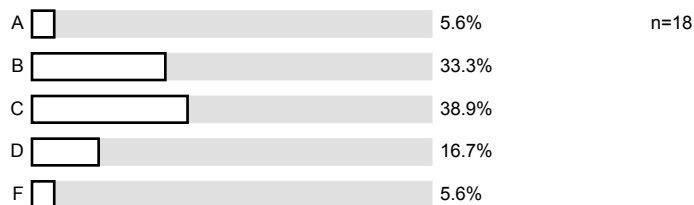

n=18

1.3) Is this course required?

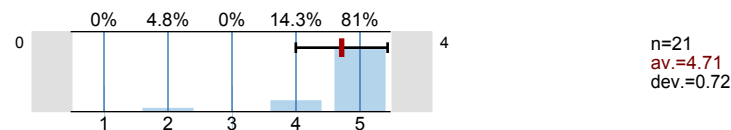

1.4) Anticipated grade in this course?

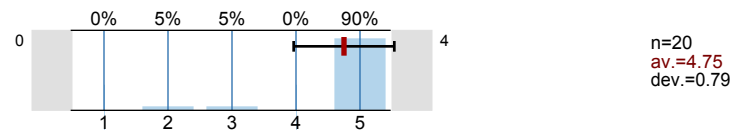

2. INSTRUCTOR EVALUATION (Part I)

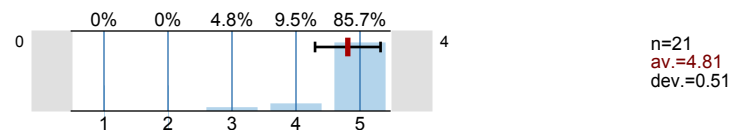

2.1) The instructor clearly stated the instructional objectives of the course.

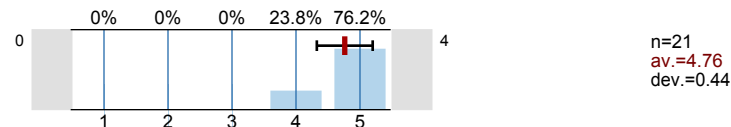

2.2) The instructor clearly stated the method by which your final grade would be determined.

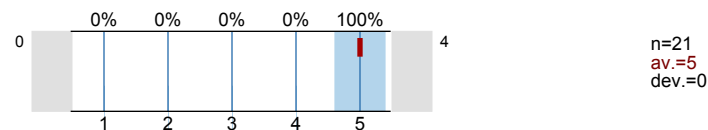

2.3) The instructor clearly explained any special requirements of attendance which differ from the attendance policy of the University.

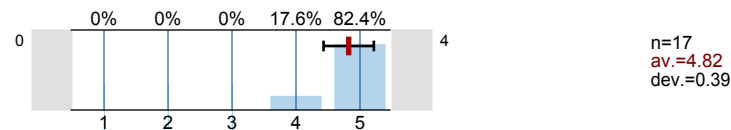

2.4) The instructor clearly graded and returned the student's written work (e.g., examinations and papers) in a timely manner.

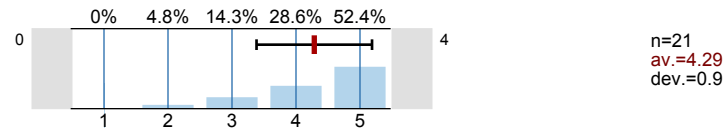

2.5) The instructor met the class regularly and at the scheduled times.

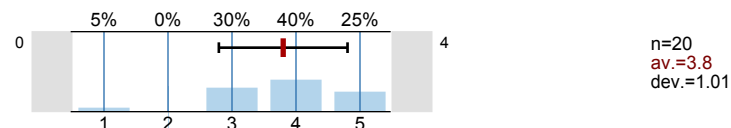

2.6) The instructor scheduled a reasonable number of office hours per week.

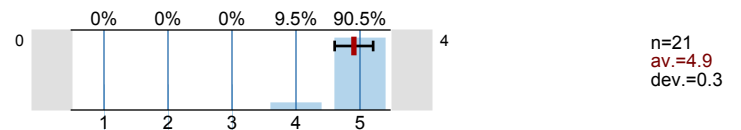

2.7) Please indicate your satisfaction with the availability of the instructor outside the classroom. (In selecting your rating, consider the instructor's availability via established office hours, appointments, and other opportunities for face-to-face interaction as well as via telephone, e-mail, fax and other means)

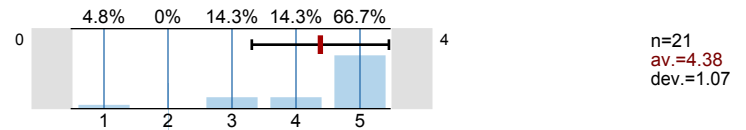

2.8) If web sites, Blackboard, or other Internet resources were a part of this course, to what extent did they enhance or detract from your learning experience in the course.

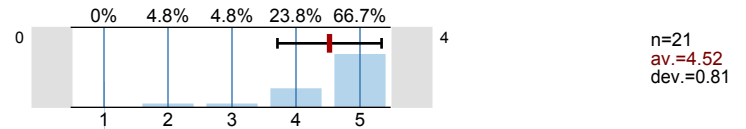

2.9) displays a clear understanding of the subject matter and course topics.

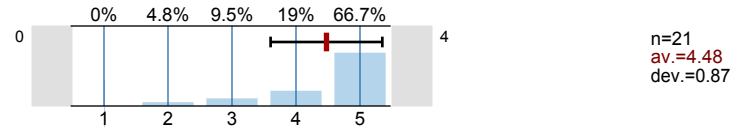

2.10) motivates me to learn the subject.

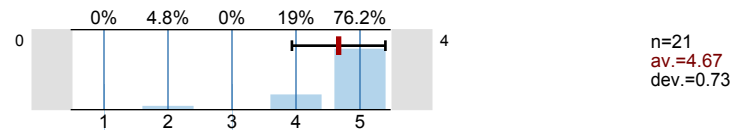

2.11) gives clear and helpful responses to student questions.

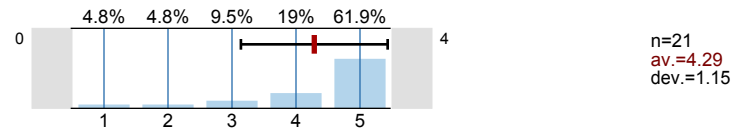

2.12) is concerned that students learn the material.

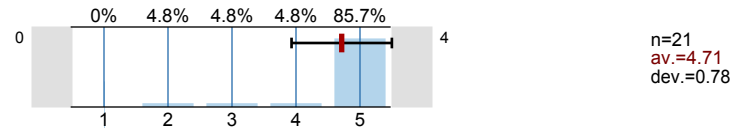

2.13) treats students with respect.

2.14) grades fairly.

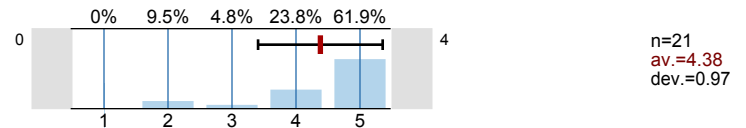

2.15) well-utilized class time, either by lecture, group work, student presentations or other activities.

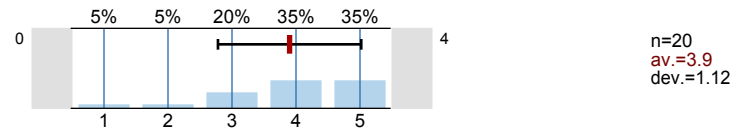

3. INSTRUCTOR OVERALL

3.1) OVERALL, considering all aspects, I rate the overall performance of my instructor as:

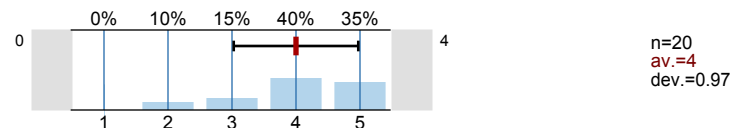

4. STUDENT OUTCOME (PART II)

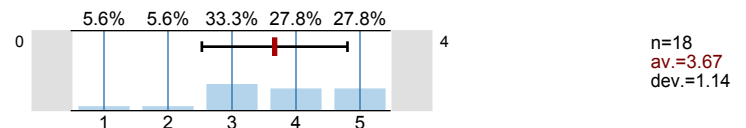

4.1) Gaining factual knowledge of this subject (terminology, methods, skills).

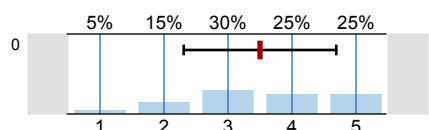

4.2) Learning fundamental principles, theories or generalizations.

4.3) Improving my oral and written communication skills.

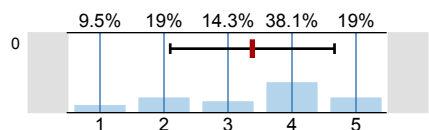

- 4.4) Learning to apply course materials to improve decision making, rational thinking and problem solving.

Comments Report

7. COURSE EVALUATION (PART V)

7.3) Please comment on what you feel are the positive and negative aspects of your instructor and his/her teaching outlook:

- Friendly
- Good at explaining
- Helped answer all my questions

A great teacher but test are too hard

Teacher made test way too hard compared to material covered in class.

The instructor was really good, I'm horrible at Math but for the most part I understand what is going on.

Great professor - really wants his students to succeed. Made sure we all got it. Everything he introduced something new and did plenty of examples.

He is great!

Very excellent professor!

Graphing
Calculators need to be used.

The classes were good and helpful, everything was clear, but the test problems were much harder than anything that was done in class or for homework. For these reasons I felt underprepared.

The class is a good one, but I had a hard time with the workload. However, the teacher was clear and concise and a very good teacher.

Positive that he was always very approachable and encouraged questions. Negative that some of the stuff he covered very quickly and I feel like I missed it.

Your class was very good and I feel that I am knowledgeable in calculus. Although there is a lot of homework, it really drives home what we learn in class.

Blanco-Silva was an awesome instructor. He was always encouraging questions and extremely receptive to every student's needs. Far superior to my calc professor in my previous college (transfer student from a top tier private institution)

The amount of homework was a lot to do along with having 4 other classes. The questions on the exams were much more difficult than the ones we went over in class. As a future math teacher I would want to test my students specifically for a particular skill and not try and trick them or confuse them with difficult algebra.

Professor Blanco is an awesome teacher. He answers ALL questions and helps students understand. He makes sure everyone in the class has received the notes off of the board before erasing. He is the best math teacher I have ever had. I hope he teaches the other math courses that

7.4) Comment on what you feel are the positive and negative aspects of this course:

- a lot of material
- 5 days a week is a lot

This course is harder than needed

The course is difficult but the instructor made it somewhat easy

There are a lot of resources, the lab with maple is a pointless waste of time, and the tutors in ACE know next to nothing and were never any help. Recitation however was helpful.

The most helpful aspect was the S.I. Sessions. The lab and the recitation were difficult to manage on top of the regular workload.

I don't think Maple was very helpful because I could solve the problems on paper but then couldn't figure how to put them into Maple.

I feel that you have taught me calculus and that I am prepared for calc II if I get CC, but I feel that your tests are harder than the problems that we cover in class and in the homework assigned.

Negative → Maple Lab → detracted from my performance and allocation of time for HW assignments in the book,

Maple is absolutely worthless to this course.
