

DEPARTMENT OF MATHEMATICS COLLEGE OF ARTS AND SCIENCES

Dear Professors:

66 George street Charleston, SC 29424

This letter is in regards to the formal submission of my application for the tenure-track position at the assistant professor level currently open at the Department of Mathematics of the College of Charleston.

I completed my doctorate in Mathematics at Purdue University in August 2007 under the direction of Prof. Bradley J. Lucier. Immediately following graduation I began a postdoctoral appointment as a Research Assistant Professor for the University of South Carolina.

My research interests include both Analysis and Scientific Computing, specifically in the study and application of Approximation Theory. Recently, the subject of my dissertation (The Curvelet Transform—A Generalized Definition and Approximation Properties) has become popular and many open questions remain open. My research in this field and the work I have done in Mathematical Imaging could be of interest to the Discovery Informatics program.

I have a very ample experience in teaching: I have had the opportunity to fulfill various teaching assignments from basic recitation duties to my own independent classes (both at undergraduate and graduate levels).

My letters of recommendation have been sent by their authors. The one written by Prof. Schep concerns teaching. Enclosed are my curriculum vitae (including a list of publications and contact information to additional reference writers), an AMS cover sheet, a research statement, and a separate list of publications with links to the online versions of each paper. All these are also available at http://blancosilva.wordpress.com

I look forward to discussing the qualifications for the position further. I can be contacted at the address listed below, by e-mail at francisco.blanco.silva@gmail.com, or by phone at (803) 386-1822. Thank you for your consideration.

Sincerely,

Francisco Javier Blanco-Silva

724 Pembroke ave,

Columbia, SC 29205
